DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,742,499 in view of VanDyne (6,029,627).

U.S. Patent No. 6,742,499 teaches detecting the variation of an ionization signal that changes with respect to an engine parameter over a combustion event of the reciprocating engine; associating a floating bounded space with the ionization signal; determining if a portion of the ionization signal is within the floating bounded space. '499 does not teach adjusting the EGR. VanDyne teaches a step of adjusting the EGR based upon the ionization signal. Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the step of adjusting the EGR on the system of '499 as taught by VanDyne in order to reduce engine emissions and increase engine efficiencies.
